- 

## Projects

1. **Tic-Tac-Toe Game**  
Created an interactive game using HTML, CSS, and JavaScript. Features include dynamic gameplay logic, user-friendly interface, and responsive design for compatibility with various devices.
2. **Clone of Spotify Website**  
Developed a visually appealing and functional clone of the Spotify website using HTML, CSS, and JavaScript. The project includes responsive design to adapt seamlessly across devices, incorporating basic design elements inspired by the original platform.

3. **Clone of Zomato Website**

Built a responsive Zomato website clone using HTML, CSS, and JavaScript. This project emphasizes replicating key UI/UX features, ensuring cross-device compatibility and maintaining a sleek design structure.

4. **Quiz App**

Designed and implemented a robust quiz application using C++ with the fstream file library for efficient data management. Features include question storage, retrieval, and scoring functionalities, offering an engaging user experience.
